

MP100 | FINAL PROJECT STATEMENT

Title: Stars

Semester/Year: 2023

Software, coding/programming languages: Audacity/Procreate

Description (5-6 sentences giving the person looking at your work insight into your creative and technical process. For example: What story did you choose to tell and why? What media did you pick and why did you think they would be the best choice to convey your story? How do the images/colors/sounds you chose for the piece relate to the subject matter? How do you envision the public encountering/interacting with the piece? What was the most challenging part of the project and how did you solve it? etc.)

The story I chose to illustrate was just a simple joke between a friend and the other friend getting annoyed at the very low effort joke. The media I chose to best illustrate the story was procreate for the drawings and for the audio behind it was Freesound. Color related to the story because it showed that they were laying out on a field looking at the sky, the sound also had a big part to play in it by it being another source for the reader to understand. I envision the public interacting with this comic with just a slight laugh or more so an understanding of it. The most challenging part of this project was the actual illustrations itself and coming up with the joke I guess, I solved it by just completing it.
